X (ICSE)	St. Francis Convent School	2021	95.80%

WORK EXPERIENCE

- Product Management Intern | Country Delight** May 2026 – July 2026
- Designed and deployed 2 A/B-tested product interventions after identifying a Calendar-only user cohort through SQL, MoEngage, and CRM funnel analysis, contributing ₹10L+ incremental revenue in 2 months.
 - Developed a personalized recommendation engine using RFM segmentation, User/Segment/Category scoring, and Impression Decay; developed a LinUCB contextual-bandit scoring approach in Python, reducing recommendation latency from 24 hours to <2 min.
 - Synthesized insights from 50+ user interviews to identify product discovery, pricing, and pack-size pain points, translating findings into product and UX improvements.
 - Co-authored 5+ PRDs for personalized bundles, cart-threshold incentives, bestseller discovery, and quick-order experiences using behavioral and competitive research.
- Product & Business Intern | Techgyan & Dyna Writing Instruments** May 2025 - July 2025
- Analyzed website KPIs and SEO performance using Google Analytics and keyword tools, increasing organic traffic by 40%+ and improving rankings from 8th to 2nd for targeted keywords.
 - Integrated an OpenAI API + Python chatbot to automate customer support, reducing response time by 30%.
 - Conducted user research and competitor benchmarking for 5+ product variants and 5 hybrid training programs, translating findings into product requirements and coordinating with vendors.
- Research Intern | Department of Entrepreneurship & Management, IIT Hyderabad** 2025
- Conducted literature review, market analysis, and Fortune 500 case studies on front-end innovation and corporate intrapreneurship.
 - Synthesized research findings into actionable frameworks for evaluating corporate innovation and sustained competitive advantage under the guidance of Dr. Nakul Parameswar and Mr. Srinivas Rao Dengeti, Senior Director, Engineering, Honeywell.

PROJECTS

- FairSlot | Agentic AI-Based Fair Allocation System | [link](#)**
- Built a multi-agent slot-booking system where personal and group agents convert free-text requests into validated preferences, while a no-LLM weighted-lottery allocator uses carry-over fairness credits to determine allocation.
 - Simulated 200 residents over 60 days; with 30% bots, reduced shut-out from 50% under first-come-first-served to 0%. Hardened the LLM layer with schema validation, rule-based fallback, and code-side normalization after live testing exposed parsing failures.
- Dr.DB, AI-Assisted PostgreSQL Optimiser | Product Space Hackathon | [link](#)**
- Built an AI-assisted PostgreSQL query optimizer combining deterministic SQLGlot anti-pattern detection with LLM-generated query and index recommendations in an interactive Streamlit app.
 - Designed a Query Health score and validation layer to check LLM outputs for syntax and schema consistency, using deterministic heuristics to estimate recommendation impact and improve trust in AI-generated suggestions.
- E-Commerce Growth & Retention Diagnostics | Olist Marketplace | [link](#)**
- Analyzed 99K+ orders using SQL, Python, and Power BI, evaluating revenue, AOV, repeat purchases, and category-level trends to identify growth and retention opportunities.
 - Identified 631% revenue growth despite 3.12% repeat purchases, recommending cohort reactivation and category-level retention strategies to convert high-value one-time customers into repeat buyers and sustain revenue growth.
- ML-Based Diffusion Model for Topology Optimization | Prof. Surendra Nath Somala, Civil Department**
- Developed and tuned a conditional diffusion model for generative structural topology optimization, designing for robustness under noisy and incomplete boundary conditions.
 - Benchmarked generative models against a CNN baseline across corruption levels (IoU 0.13–0.71); developed a confidence-weighted ensemble to improve prediction reliability with no added inference cost.
- Portfolio:** Complete overview of my projects, experience, achievements, and interests. | [View Portfolio](#)

POSITIONS OF RESPONSIBILITY

- Manager, Corporate Relations & Finance | E-Cell, IIT Hyderabad** August 2023 - March 2025
- Drove ₹30L+ in sponsorship revenue, developing frameworks to evaluate sponsorship ROI and partnership performance.
 - Contributed to securing collaborations and MoUs with 50+ VCs and 400+ startups.
 - Secured and managed partnerships with Masters' Union, Innomet, NPCI, and Amazon.
 - Played a key role in driving 3X YoY growth in E-Cell activities and engagement in 2023–24, sustaining it through 2024–25.
- Coordinator, Public Relations | Elan&nVision, IIT Hyderabad** June 2024 - April 2025
- Led a 12-member team across outreach and social media initiatives, collaborating with The Face Magazine and Hindustan Times to drive 10,000+ registrations and 4,000+ on-ground attendees for Elan & nVision 2025.
 - Grew social media following by 2,000+ through targeted content and engagement initiatives; led website content strategy and execution, coordinating cross-functional efforts to strengthen event visibility and digital reach.

EXTRACURRICULAR

- Board Game Enthusiast** | Played 50+ genre-diverse board games, conducted board game sessions through LITSOC at IIT Hyderabad, and won multiple sessions.
- National Finalist** | EY CAFTA Case Championship 2025
- Runner-up** | Finance & Consulting Campus Case Challenge, IIT Hyderabad
- Core Member** | Books & Movies Club, IIT Hyderabad
- Silver Medalist** | NSO English Olympiad

SKILLS

Product: Product Strategy, Product Metrics, User Research, Consumer Insights, Funnel & Cohort Analysis, A/B Testing, Experimentation, PRD Development, Competitive Analysis

AI & Technical: Python, SQL, PostgreSQL, Machine Learning, AI/LLM Applications, Contextual Bandits, Power BI, Excel, MoEngage, CRM, Jira, Figma, Git/GitHub, FastAPI

RELEVANT COURSES

Innovation Management, Competitive Strategy for Startups, International Business, Startup Financing, Economics for Technocrats, Introduction to Organizational Structures, Game theory, Statistics, Programming, Probability, Linear Algebra, Machine Learning, Artificial Intelligence
